## 01 Design Principles

Observed across all four screens.

|                              |                                                                                                                      |             |
|------------------------------|----------------------------------------------------------------------------------------------------------------------|-------------|
| Dark warm "Egyptian" ground  | Near-black brown (#000A07) with a soft amber radial glow at top; one gold accent (#E8A33D) carries all emphasis.     | LG LB PR MT |
| One accent, tints for states | Amber at 14% for chips/badges, 20-30% for focus rings, 60% for featured borders. No second brand hue.                | LB LG MT    |
| Three-font role split        | Marcellus = names, titles, brand. Saira = UI text and buttons. Spline Sans Mono = numbers, labels, status.           | a11         |
| Hairline surfaces            | Panels separate from ground by 1px rgba(255,240,210,.07) borders and a slightly lighter fill, not by strong shadows. | a11         |
| Fixed landscape canvas       | 932 x 430 px screen, uniformly scaled to fit the viewport (pad 24px). Layout is absolute/grid inside it.             | LG LB PR MT |
| Unicode glyph iconography    | ☞ ◊ ♠ ♣ ✕ ✦ ✧ ✨. Only custom shapes: CSS gem and Google G.                                                           | LB LG       |
| Quiet motion                 | .12-.3s ease on color/border/background; press scale .97-.98; hover brightness 1.06.                                 | LG LB MT    |

## 02 Color Tokens

Tokens are declared identically in /root of LG, LB, PR, MT. LB omits --panel-hi (unused there).

|                                                                |                                                                             |                                                                               |                                   |                                     |

## 14 Decorative / Branding

|                  |                                                                                        |             |
|------------------|----------------------------------------------------------------------------------------|-------------|
| Crest + wordmark | ☞ above "ESTIMATION" in Marcellus caps with amber glow                                 | LG PR MT LB |
| Taglines         | Bid boldly. Play sharp. / The Competitive Egyptian Strategy Card Game                  | LG LB       |
| Card art         | Painted images (Ranked Match, Play with Friend, AI) with bottom scrim; center-top crop | LB          |
| Wood grain       | Vertical stripe overlay on lobby top                                                   | LB          |
| Glow             | Amber radial from the top edge on every screen                                         | a11         |

## 15 Layout Rules

|                       |                                                                                                       |          |
|-----------------------|-------------------------------------------------------------------------------------------------------|----------|
| Lobby                 | Topbar (player left, wallet right) > masthead row > 4-col grid (3 modes + 30+ side) > 40px bottom nav | LB       |
| Centered card screens | .wrap flex column, centered: masthead above a single card                                             | LG PR MT |
| Mode card content     | Bottom-anchored: h2, sub, CTA; pointer events only on buttons                                         | LB       |
| Match view            | Seats absolutely placed in a 160px area; panels stack vertically below                                | MT       |

## 16 Mobile / Android Rules

|             |                                                                         |     |
|-------------|-------------------------------------------------------------------------|-----|
| Orientation | Landscape only; 932x430 base (~iPhone14-Pro-Max landscape ratio 2.17:1) | a11 |
| Fit         | scale = min((vw-24)/932, (vh-24)/430), centered, overflow hidden        | a11 |
| Match modal | Designed to fit 800x480; scoreboard caps at 34vh under 628px width      | MT  |
| Touch       | 44px target via pseudo-element on bd-btn; user-select none on screen    | MT  |
| Safe areas  | Not handled in any screen                                               | 8AP |

## 17 Component States

|                |                                                                          |          |
|----------------|--------------------------------------------------------------------------|----------|
| Hover          | Border to accent-dim / bg to panel-hi / text to accent / brightness 1.06 | a11      |
| Active         | scale .97 (CTA) / .98 (primary) / .94 (add)                              | LB LG    |
| Focus          | accent border + 3px ring (inputs only)                                   | SU       |
| Disabled       | opacity .42 (.45 modal), not-allowed, filter none                        | MT       |
| Selected       | accent border, accent text, 14% tint                                     | MT       |
| Turn / pending | accent border + 25-30% ring                                              | MT       |
| Error          | #C1A026 border, #E0836A text; illegal bid hint uses same red             | SU MT    |
| Loading        | Skeleton; "==" placeholders in Profile; "Loading match." pill            | SU PR MT |
| Empty          | Dashed card chip; mono 9px --ink-faint centered text                     | MT       |

## 18 Consistency Rules and Inconsistencies

Rule: use the value that appears most often; the list below should be standardized later.

|                           |                                                                                                                |                |
|---------------------------|----------------------------------------------------------------------------------------------------------------|----------------|
| Masthead scale            | LB 38px left-aligned vs 19px centered elsewhere. Intentional (hero vs compact).                                | LB vs LG PR MT |
| Screen card width/padding | 336/360/460 and pad 12-16 vs 20. LG is compressed to fit 430px height.                                         | LG PR MT       |
| Button treatments         | Primary: gradient (LG, MT bd-btn-primary) vs solid (MT modal). Pick gradient.                                  | LG MT          |
| Pill radii                | 11, 12, 14, 16 for the same chip role. Majority: 12.                                                           | LB MT          |
| Chip tint                 | Ready pill uses red tint rgba(193,64,38,.2) with amber text; all other chips use amber 14%. Likely unintended. | LB             |
| Avatar                    | Gradient ring (LB) vs solid dim border (PR) vs hairline (seat).                                                | LB PR MT       |
| Rank chip                 | Saira 12/600 (LB) vs Mono 11/600 (PR).                                                                         | LB PR          |
| Hard-coded colors         | #2B2620, #3A332A, #6F685B, #8B866A, #1A1208, #C1A026, #E0836A have no token.                                   | LB MT SU       |
| Stale gray                | Dim bar #6F685B equals the pre-audit --ink-faint                                                               | LB             |
| Token gaps                | --panel-hi missing in LB /root; --glow only partly applied                                                     | LB             |
| Sub-legible text          | 7.5, 8, 8.5 9px mono used; below 10px                                                                          | MT PR LG       |
| Touch targets             | Add 28, nav 28, stepper 24, close 28; under 44px. Only bd-btn has an expanded hit area.                        | LB MT SU       |
| Crown glyph               | ☞ emoji in Match Complete modal vs ☞ glyph elsewhere.                                                          | MT vs rest     |
| Transition timing         | .12s vs .13s vs .15s                                                                                           | LB LG SU       |
| Debug UI in Lobby         | "Toggle Ready" link, alert().prompt(): not part of the visual system.                                          | LB             |
